## APPENDIX

RECEIVED

NOV 29 2002

TECHNOLOGY CENTER 2800

Please amend claim 1 as follows:

1 (Amended). A flat panel display comprising:

a tiled array of display elements wherein each display element has a front surface that emits light and a back surface that does not substantially emit light;

a seam between adjacent display elements, said seam having a length; and

a strap attached to said back surfaces [over] along the seam length [seams] between the display elements.

Please amend claim 5 as follows:

5 (Amended). The display of claim [4] 6 wherein the perpendicular straps are attached to the frame.

Please amend claim 11 as follows:

11 (Amended). A method comprising:

arranging an array of display elements to form a flat-panel display, the display elements each having a front surface that emits light and a back surface that does not substantially emit light; and

securing a strap [across] to said back surfaces along the length of seams between the adjacent display elements.

Please amend claim 17 as follows:

17 (Amended). A method comprising:

configuring a flat-panel display from an array of display elements, each of the display elements having a front surface that emits light and a back surface that does not substantially emit light;

fastening straps [across] along the length of seams [between] on said back surfaces of the adjacent display elements; and

redistributing a stress placed on [a transparent] said front surface of a flat-panel display to said straps.
